	PAGES
Le Symposium Lavoisier *(Symposium Proceedings: 13–16 July 1994)*	
Introductory Notes. *Andrew Prentice*	1–8
Cellular Fuel Selection *(Symposium Proceedings: 13–16 July 1994)*	
Fuel selection at the level of mitochondria in mammalian tissues. *Richard M. Denton & James G. McCormack*	11–22
Fatty acid transport and fatty acid-binding proteins. *Jacques H. Veerkamp*	23–37
Fuel selection in brown adipose tissue. *Paul Trayhurn*	39–47
Cellular aspects of fuel mobilization and selection in white adipocytes. *Max Lafontan & Dominique Langin*	49–63
Fuel utilization by cells of the immune system. *Philip C. Calder*	65–82
Fuel selection in intestinal cells. *Pierre-Henri Duée, Beatrice Darcy-Vrillon, François Blachier & Marie-Thérèse Morel*	83–94
Energy substrates for the rumen epithelium. *Didier Rémond, Isabelle Ortigues & Jean-Pierre Jouany*	95–105
Fuel selection, muscle fibre. *Eric Hultman*	107–121
Organ Fuel Selection *(Symposium Proceedings: 13–16 July 1994)*	
Muscle fuel selection: effect of exercise and training. *Jan Henriksson*	125–138
Hepatic fuel selection. *Manfred J. Müller*	139–150
Organ fuel selection: brain. *Stephanie A. Amiel*	151–155
Metabolic fuel selection by intestinal epithelium. *Jehan-François Desjeux*	157–163
Substrate selection and oxygen uptake by the lactating mammary gland. *Dermot H. Williamson, Patricia Lund & Rhys D. Evans*	165–175
Fuel selection in white adipose tissue. *Keith N. Frayn, Sandy M. Humphreys & Simon W. Coppack*	177–189
The human epidermis. *Karin U. Schallreuter & John M. Wood*	191–195
Fuel selection by the kidney: adaptation to starvation. *Gabriel Baverel, Bernard Ferrier & Mireille Martin*	197–212
General integration and regulation of metabolism at the organ level. *M. Elia*	213–232
Whole-Body Fuel Selection *(Symposium Proceedings: 13–16 July 1994)*	
Whole-body fuel selection in ruminants: nutrient supply and utilization by major tissues. *Isabelle Ortigues & Anne-Laure Visseiche*	235–251
Nutrient effects: post-absorptive interactions. *Eric Jéquier*	253–265
Feeding, fasting and starvation: factors affecting fuel utilization. *I. A. Macdonald & J. Webber*	267–274
What determines fuel selection in relation to exercise? *Arne Lindholm*	275–282

Whole-body fuel selection: 'reproduction'. *John J. Robinson & Michael E. Symonds* 283–299
Comparative studies on programmes for management of energy supply: torpor, pre-winter fattening and migration. *J. F. Andrews* 301–315
Metabolic fuel selection: general integration at the whole-body level. *Philip J. Randle* 317–327

The Nutrition Society 1994 Silver Medal Lecture *(Symposium Proceedings: 2–5 August 1994)*

Pregnancy, parturition and neonatal development: interactions between nutrition and thyroid hormones. *Michael E. Symonds* 329–343

Plenary Lecture *(Symposium Proceedings: 2–5 August 1994)*

Nutritional influences on pancreatic development and potential links with non-insulin-dependent diabetes. *S. Dahri, B. Reusens, C. Remacle & J. J. Hoet* 345–356

Investing in Nutrition: Maximizing Returns *(Symposium Proceedings: 2–5 August 1994)*

Nutrition in overseas aid: the investors' perspective. *Julian Lambert* 357–360
Priorities for nutrition interventions in reproductive health: a bilateral agency perspective. *Frances R. Davidson* 361–366
Investing in nutrition at the national level: an African perspective. *Festo P. Kavishe* 367–378

Maternal–Offspring Interactions *(Symposium Proceedings: 2–5 August 1994)*

Maternal nutrition and the regulation of milk synthesis. *Peter Hartman, Jillian Sherriff & Jacqueline Kent* 379–389
Evolutionary and environmental influences on human lactation. *Andrew M. Prentice & Ann Prentice* 391–400
Breast-feeding: matching supply with demand in human lactation. *C. J. Wilde, A. Prentice & M. Peaker* 401–406
The relationship between breast-feeding and infant health and development. *J. S. Forsyth* 407–418

Basic Mechanisms of Food Preference and Liking *(Symposium Proceedings: 2–5 August 1994)*

How food preferences are learned: laboratory animal models. *Anthony Sclafani* 419–427
Food preferences in farm animals: why don't they always choose wisely? *J. Michael Forbes & Ilias Kyriazakis* 429–440
An effective procedure for changing food preferences in 5–7-year-old children. *Pauline J. Horne, C. Fergus Lowe, Paul F. J. Fleming & Alan J. Dowey* 441–452
Understanding fat preference and consumption: applications of behavioural sciences to a nutritional problem. *David J. Mela* 453–464

Micronutrient Interactions *(Symposium Proceedings: 2–5 August 1994)*

Iron–zinc and calcium–Fe interactions in relation to Zn and Fe absorption. *Susan J. Fairweather-Tait* 465–473
Vitamin E and selenium: contrasting and interacting nutritional determinants of host resistance to parasitic and viral infections. *Orville A. Levander, Arba L. Ager Jr & Melinda A. Beck* 475–487
Copper and zinc metabolism in health and disease: speciation and interactions. *Ian Bremner & John H. Beattie* 489–499
Interdependence of vitamin A and iron: an important association for programmes of anaemia control. *Martin W. Bloem* 501–508
Riboflavin–iron interactions with particular emphasis on the gastrointestinal tract. *Hilary J. Powers* 509–517

Nitrogen Transactions in the Gut *(Symposium Proceedings: 2–5 August 1994)*

Intestinal oligopeptide transport. *C. A. R. Boyd* 519–523
Regulation of gut glutamine metabolism: role of hormones and cytokines. *Naji N. Abumrad, Soojin Kim & Patricia E. Molina* 525–533
Salvage of urea-nitrogen and protein requirements. *Alan A. Jackson* 535–547
Metabolic implications of ammonia production in the ruminant. *D. S. Parker, M. A. Lomax, C. J. Seal & J. C. Wilton* 549–563

Icons Workshop Report *(Symposium Proceedings: 2–5 August 1994)*

Nutrition information and support for overseas members. *Jackie Landman & Ann Burgess* 565–568

Body Composition Methodology *(Symposium Proceedings: 1 November 1994)*

Review of Macronutrient Metabolism Group Workshop. *Susan A. Jebb* 569–577

The Sir David Cuthbertson Medal Lecture *(Symposium Proceedings: 6–8 December 1994)*

Enteral-feeding-related diarrhoea: proposed causes and possible solutions. *Timothy E. Bowling* 579–590

CMNSG Guest Lecture *(Symposium Proceedings: 6–8 December 1994)*

The insulin-like growth factors in critical illness: pathophysiology and therapeutic potential. *Jeff M. P. Holly* 591–599

Moving Points in Clinical Nutrition *(Symposium Proceedings: 18 February 1994)*

The effects of dietary change on serum cholesterol. *I. U. Haq, W. W. Yeo, P. R. Jackson & L. E. Ramsay* 601–616

Nutrition and Ageing *(Symposium Proceedings: 17 February 1995)*

Energy balance and health in SENECA participants. *Wija A. Van Staveren, Lisette C.P.G.M. de Groot, Jan Burema & Cees de Graaf* 617–629

The British National Diet and Nutrition Survey of people aged 65 years or over: protocol and feasibility study. *J. M. Hughes, G. Smithers, C. Gay, P. C. Clarke, P. Smith, C. Lowe, A. Prentice, C. Bates, M. Whitelaw & S. Bingham* 631–643
Some nutritional aspects of ageing in dogs and cats. *E. J. Taylor, C. Adams & R. Neville* 645–656
McCay's hypothesis: undernutrition and longevity. *Edward J. Masoro* 657–664

Nutrition for the Elderly *(Symposium Proceedings: 17 February 1995)*

Effects of exercise training in the elderly: impact of progressive-resistance training on skeletal muscle and whole-body protein metabolism. *Roger A. Fielding* 665–675
Functional ability and nutritional status of free-living elderly people. *Mary C. Manandhar* 677–691
Cost-effectiveness of nutritional support in the elderly. *S. P. Allison* 693–699

Nutrition in Clinical Management: The Eating Disorders *(Symposium Proceedings: 23 February 1995)*

The dyslipophobias: a view of the psychopathologies involved and the hazards of construing anorexia nervosa and bulimia nervosa as 'eating disorders'. *Arthur H. Crisp* 701–709
Practical management of eating disorders. *Margaret M. Doyle* 711–719
Is obesity an eating disorder? *Susan A. Jebb & Andrew M. Prentice* 721–728

Psychosocial Influences on Food Choice: Implications for Dietary Change *(Symposium Proceedings: 25 April 1995)*

Social influences on food choice and dietary change: a sociological perspective. *Anne Murcott* 729–735
Unrealistic optimism about diet-related risks: implications for interventions. *Monique M. Raats & Paul Sparks* 737–745
Parental influences on children's diets. *Jane Wardle* 747–758
Looking for 'fresh' food: diet and lone parents. *Elizabeth Dowler & Claire Calvert* 759–769

ABSTRACTS OF COMMUNICATIONS

13–16 July 1994

Feeding cholesterol blunts the proliferative effect of dietary guar gum. *M. M. A. K. Khattak & J. C. Mathers* 2A
The role of glucose and pyruvate in the nutrition of preimplantation mouse embryos. *K. L. Martin & H. J. Leese* 3A
Free and total carnitine concentrations in continuous ambulatory peritoneal dialysis patients. *D. P. J. Kirby, D. Constantin-Teodosiu, A. H. Short, R. P. Burden, A. G. Morgan & P. L. Grenhaff* 4A
Incorporation of fatty acids into macrophage lipids *in vitro*. *P. Yaqoob, E. A. Newsholme & P. C. Calder* 5A

Mechanisms underlying induction of fatty acid binding protein genes by peroxisome proliferators along the small intestine. *A Mallordy, P. Besnard, H. Poirier, I. Niot & H. Carlier* 6A

Effect of animal or vegetable protein intakes (100, 200 or 300 g casein or soya-bean protein/kg) on membrane hepatocyte very-low-density lipoprotein (VLDL) receptors. *J. Prost, D. Ait-Yahia, M. L. Suarez-Rey, Z. Arribi & J. Belleville* 7A

Modifications in the lipolytic response to β_1, β_2 and β_3-adrenergic agonists after the administration of a non-selective β-agonist. *J. A. Martinez, M. A. Garcia-Calonge, E. Simon, A. S. Del Barrio & M. P. Portillo* 8A

The physiological function of β_1- and β_3-adrenoceptors in rat brown adipocytes. *C. Atgié, F. D'Allaire, P.-M. Simard, P. Mauriège & L. J. Bukowiecki* 9A

Alpha-2 adrenergic stimulation and resting energy expenditure in menopausal women before and during oestrogen therapy. *G. Del Rio, R. Menozzi, C. Zandomeneghi, M. G. Venneri, G. Zizzo & A. Velardo* 10A

Evidence of an association between blunted postprandial thermogenesis and insulin resistance. *C. Macor, E. Rella, S. Favro, R. Vettor & G. Federspil* 11A

Insulin resistance in human pregnancy: a comparison of *in vivo* and *in vitro* measurement techniques. *K. Stanley, D. Mangnall, C. Bruce & R. B. Fraser* 12A

Assessment of physical fitness by submaximal exercise. *M. Cox, N. R. Gibson, M. Khalouha, K. Mills & P. J. Pacy* 13A

Physical Activity Level in free-living persons measured by doubly-labelled water. *A. E. Black & T. J. Cole* 14A

^{2}H and ^{18}O natural abundance variations and their consequences in the doubly-labelled water measurement of energy expenditure. *P. Ritz, T. J. Cole & W. A. Coward* 15A

The measurement of energy expenditure in young children by the minute-by-minute heart-rate method: a validation study. *J. A. Payne, A. C. Payne, N. R. Belton, M. M. Rollo & S. Downie* 16A

Components of total energy expenditure during refeeding in the rat. *P. C. Even, A. Pele & S. Nicolaidis* 17A

Components of heat production in pigs: effects of stage of growth and genotype. *Y. Le Cozler, S. Dubois & J. Noblet* 18A

Measuring energy expenditure in Polar explorers. *P. Ritz, W. A. Coward, T. J. Cole, M. A. Stroud & M. B. Sawyer* 19A

Changes in energy expenditure, glucose-induced thermogenesis and protein turnover during short-term head-down-tilt conditions. *K. J. Acheson, J. Décombaz, C. Piguet-Welsch, F. Montigon, B. Decarli, I. Bartholdi & E. B. Fern* 20A

Energy expenditure in lean and obese prepubertal 9–10 year old children. *J. P. Delany, G. A. Bray, D. W. Harsha, J. Kime & L. Melancon* 21A

Total energy expenditure, net protein, carbohydrate and fat oxidation in pregnant and postpartum women. *N. Butte, J. Hopkinson, J. Moon, A. Adolph, M. Puyau & F. Vohra* 22A

Total energy expenditure, basal metabolic rate and physical activity plus thermogenesis in a group of free-living elderly men aged over 75 years. *N. J. Fuller, W. A. Coward, M. B. Sawyer, P. Paxton & M. Elia* 23A

Total and activity-related heat production of group-confined pigeons as affected by gender and space. *J. Gorssen, P. Koene, J. W. Schrama & F. Van der Veen* 24A
Food consumption and energy metabolism of *Spodoptera littoralis* Boisdoval (Lepidoptera, Noctuidae), feeding on an aflatoxin-containing diet. *M. Wedenig, K. Crailsheim & M. M. Sadek* 25A
Shivering is the main thermogenic mechanism in cold-exposed newborn pigs. *D. Berthon, P. Herpin & J. Le Dividich* 26A
Resting metabolic expenditure in patients with end-stage liver insufficiency. *J. C. Manelli, C. Badetti, V. Bernini, J. di Costanzo, C. Champeau & V. Pellegrin* 27A
Cold- and diet-induced thermogenesis in the pre-ruminant kid goat and lamb. *M. R. Sanz Sampelayo, I. Prieto, J. Fonolla, F. Gil Extremera & J. Boza* 28A
Physiological interactions between proliferating lymphocytes and adjacent adipose tissue. *C. M. Pond & C. A. Mattacks* 29A
The new β3-agonist CL 316 243 decreases plasma glucose levels and markedly stimulates glucose uptake in brown and white adipose tissues. *L. J. Bukowiecki, X. Liu, C. Atgié & F. Pérusse* 30A
Seasonal changes of mass and lipid droplet size in brown adipose tissue of the Pygmy shrew (*Sorex minutus*). *R. M. McDevitt & J. F. Andrews* 31A
Effect of maternal glucose infusion during late gestation on brown adipose tissue and liver iodothyronine 5′deiodinase activity in the newborn lamb. *L. Clarke, M. A. Lomax & M. E. Symonds* 32A
Variation of energy metabolism among ruminant muscles: low glucose utilization potential by oxidative muscles. *F. Bornes, J. F. Hocquette, M. Balage, P. Ferre, B. Picard & M. Vermorel* 33A
Mechanisms underlying muscle insulin resistance in late pregnancy. *M. J. Holness & M. C. Sugden* 34A
Synthesis and degradation of hepatic glycogen in uraemic rats. *Z. Bakkour, D. Laouari & C. Kleinknecht* 35A
Differential handling of substrates in rat strains that vary in their sensitivity to dietary obesity. *H. Nagase, D. A. York & G. A. Bray* 36A
Selective *in vivo* and *in vitro* mobilization of individual fatty acids during fat store depletion. *R. Groscolas, E. Mioskowski & T. Raclot* 37A
Fish oil attenuates long-term enhancement of hepatic pyruvate dehydrogenase kinase activity by dietary saturated fat. *M. C. Sugden, M. J. Holness, K. A. Orfali & L. G. D. Fryer* 38A
Recycling of the carbon skeleton of polyunsaturates during lipid synthesis in the neonatal rat brain. *S. C. Cunnane, S. S. Likhodii & M. A. Crawford* 39A
Lipoprotein lipase activity in bovine and ovine adipose tissue explants: effects of insulin and/or dexamethasone. *Y. Faulconnier & Y. Chilliard* 40A
The effects of meal frequency on lipoprotein lipase activity. *C. Hallett, S. G. Isherwood, J. A. Lovegrove & M. C. Murphy* 41A
Lipoprotein lipase activity in muscular and adipose tissues from normal and double-muscled growing calves. *J. F. Hocquette, S. Brazi, T. Olivecrona, G. Bengtsson-Olivecrona & Y. Geay* 42A
Nutritional manipulation of perirenal adipose tissue development in hand-reared postnatal lambs. *J. J. Gate, J. A. Bird, M. J. Bryant, L. Clarke, M. A. Lomax & M. E. Symonds* 43A

Could linoleate be a significant metabolic fuel during fluctuating but adequate energy intake? *S. C. Cunnane & Z.-Y. Chen* 44A
Time course of the effect of diets rich in *n*-6 or *n*-3 polyunsaturated fatty acids on serum cholesterol levels, liver weights and adipose deposition in the rat. *E. J. Sherrington, N. M. Jeffery & P. C. Calder* 45A
Rates of triacylglycerol and cholesterol synthesis and the effects of fitness. *M. L. Thomason, M. J. Rennie & P. Watt* 46A
Effect of carbohydrate overfeeding and underfeeding on *de novo* lipogenesis and insulin levels. *J.-M. Schwarz, R. A. Neese, D. Dare, S. T. Turner & M. K. Hellerstein* 47A
De novo lipogenesis and energy expenditure before and after food restriction in morbid obesity. *J. M. Hibbert, J.-M. Schwarz, D. C. Gore, R. A. Neese, M. K. Hellerstein & H. J. Sugerman* 48A
The effects of meal frequency on postprandial plasma triacylglycerol and non-esterified fatty acid concentrations. *J. A. Lovegrove, S. G. Isherwood, C. Hallett & M. C. Murphy* 49A
Dietary fat oxidation in lean and obese women: effect of energy status. *B. J. Sonko, A. M. Prentice, P. R. Murgatroyd & G. R. Goldberg* 50A
Fatty acid turnover and oxidation during starvation and in response to infused adrenaline in man. *J. Webber, J. Taylor, H. Greathead, J. Dawson, P. J. Buttery & I. A. Macdonald* 51A
Regulation of the plasma non-esterified fatty acid concentration after meals. *J. Callow, R. Owen, B. A. Fielding, J. S. Samra & K. N. Frayn* 52A
Origin of the early post-prandial triacylglycerol peak. *B. A. Fielding, R. Owen, J. Callow & K. N. Frayn* 53A
Plasma lipoprotein composition and amounts in patients with chronic renal failure on haemodialysis. *K. Mekki, M. Meghelli, M. Remaoun, J. Prost, H. Merzouk & J. Belleville* 54A
Effects of low-fat versus high-fat meals on hunger ratings, plasma hormone and metabolite levels, and energy intakes at the next meal. *A. Himaya, J. Louis-Sylvestre, L. Brondel, J. M. Antoine & M. Fantino* 55A
Portal appearance of orally administered free and peptide-bound amino acids in rats. *C. J. Seal, Gayle B. Spiller & D. S. Parker* 56A
The influence of starvation and amino acid administration on whole-body protein kinetics in obese adults. *P. J. Pacy, N. R. Gibson & D. Halliday* 57A
Energetic cost of protein metabolism in young and elderly healthy humans. *Y. Boirie, P. Ritz, P. Gachon & B. Beaufrere* 58A
Modulation of leucine oxidation by variation of dietary protein and glucose supplementation. *J. L. Bowtell, M. J. Rennie, O. Rooyackers & A. J. M. Wagenmakers* 59A
Postprandial protein utilization in normal adults. 1. Milk protein measured in the steady state. *N. Gibson, A. Fereday, M. Cox, D. Halliday, P. J. Pacy & D. J. Millward* 60A
Is steady-state plasma enrichment obtained through conventional enteral administration of stable isotope tracers? *P. Crenn, F. Thuillier, M. Rongier, B. Messing & J. F. Desjeux* 61A

Effects of varying glucose:lipid ratios on leucine metabolism in patients receiving parenteral nutrition. *S. Lima-Dutra, F. Thuillier, D. Darmaun, M. Rongier, B. Rakotoambinina, B. Messing & J. F. Desjeux* 62A
Postprandial protein utilization in normal adults. II. Milk protein measured in the non-steady state. *A. Fereday, N. Gibson, M. Cox, D. Halliday, P. J. Pacy & D. J. Millward* 63A
Lysine utilization in growing pigs at three different levels of protein. *S. Langer & M. F. Fuller* 64A
Glutamine metabolism in ten different adipose depots of adult guinea pigs after feeding, fasting and exercise. *J. E. Digby & C. M. Pond* 65A
Muscle protein turnover in doublemuscled Belgian Blue bulls during reduced and subsequent adequate energy and protein intake. *C. Van Eenaeme, J. L. Hornick, S. Gauthier, P. Van Calster & L. Istasse* 66A
A method for the isolation and derivatization of plasma taurine for use in stable isotope tracer kinetic studies. *F. Iglicki, L. Marks, F. Thuillier & B. Messing* 67A
Protein metabolism in *Spodoptera littoralis* Boisdoval (Lepidoptera, Noctuidae) and its response to some aflatoxins. *M. M. Sadek, K. Crailsheim & S. G. Azab* 68A
Carbohydrate homeostasis: the principle of macronutrient fuel selection in the growing rat allowed three dietary choices. *J. Mauron, Sun-Hee Kim & R. J. Wurtman* 69A
Effects of the dissociation of carbohydrates and lipid-protein foods in the diet on 24-h substrate oxidation in moderately obese women. *X. H. Lyon, Y. Schutz, V. di Vetta & S. Gardiol* 70A
Digestion of complex carbohydrates in infants. *B. de Vizia & F. di Donato* 71A
Effects of dietary fish oil on metabolic responses induced by an oral fructose and glucose load in healthy adults. *J. Delarue, C. Couet, R. Cohen, M. Objois, J. F. Brechot, M. Pinault & F. Lamisse* 72A
A validation of measurements of fat mass by dual energy X-ray absorptiometry against direct analysis in an infant model. *Susan A. Jebb, M. Tarzi, G. Jennings & M. Elia* 73A
Effects of energy restriction and parity on exogenous glucose utilization in anoestrus post-partum suckled Charolais beef cows. *A. A. Ponter, B. Grimard, P. Humblot, N. Novak, B. Khireddine, D. Sauvant, J. P. Mialot & M. Thibier* 74A
Increased energy requirements during trypanosomiasis infection in goats. *J. T. P. Van Dam, P. Hofs, D. Ogwu, M. W. A. Verstegen & D. Zwart* 75A
Recombinant human growth hormone changes the intrinsic sex-effect differences on body composition in mice. *A. Agis-Torres, M. E. López-Oliva, M. T. Únzaga & E. Muñoz-Martínez* 76A
Metabolic and hormonal responses to starvation and incremental refeeding in sheep. *A. R. G. Wylie* 77A
Prevalence of dyslipoproteinemias in patients with liver disease: impact of cause, clinical stage and nutritional status. *P. Sörös, O. Selberg & M. J. Müller* 78A
Compliance with dietary advice directed towards increasing the carbohydrate:fat ratio of the everyday diet. *X. H. Lyon, V. di Vetta, H. Milon, E. Jéquier & Y. Schutz* 79A

In smokers, is fat intake due to protein appetite? *M. Chabert, D. Lepeltier & J. Louis-Sylvestre* 80A

22–24 June 1994

Nutritional concerns of carers for, and nutritional status of, individuals with cerebral palsy in a residential home. *A. Fayne, M. Moran & S. Sugrue* 82A

2–5 August 1994

Body Mass Index, body composition and age in rural Nepali men and women. *V. R. Tuffrey, S. S. Strickland, S. J. Ulijaszek & G. M. Gurung* 84A
Recruitment bias to a randomized controlled trial of obesity treatment, and reasons for drop out. *C. J. Watts, C. D. Summerbell & J. S. Garrow* 85A
The need for a new shape chart for assessing the risks of obesity. *M. A. Ashwell* 86A
Intrauterine and postnatal influences on the biochemical antecedents of atherosclerotic vascular disease in children. *T. Forrester, F. Bennett, R. Wilks, D. Simeon, M. Allen, P. Scott, A. Morris & M. Stewart* 87A
Intrauterine and postnatal influences on blood pressure in childhood. *T. Forrester, R. Wilks, F. Bennett, D. Simeon, M. Allen, P. Scott, A. Morris & M. Stewart* 88A
Manipulation of postprandial triacylglycerol concentration and coagulation factor VII activity with low-fat diet and/or fish-oil supplementation. *H. M. Roche & M. J. Gibney* 89A
The influence of sulphur amino acids and enzymes associated with synthesis and recycling of reduced glutathione in maintaining glutathione status after tumour necrosis factor α (TNF) injection in rats. *E. A. L. Hunter & R. F. Grimble* 90A
Urea kinetics in normal breast-fed infants measured in their home. *H. A. Steinbrecher, D. M. Griffiths & A. A. Jackson* 91A
Plasma antioxidant status in Peripheral Arterial Disease. *C. O'Brien & M. Nelson* 92A
Effect of maternal glucose infusion during late gestation on the metabolic and hormonal environment at parturition in sheep. *L. Clarke, M. A. Lomax & M. E. Symonds* 93A
Weight loss improves thrombotic and rheological risk factors for ischaemic heart disease. *C. R. Hankey, A. Rumley, G. D. O. Lowe & M. E. J. Lean* 94A
Body composition changes after vertical band gastroplasty in obese females. *N. J. Fuller, M. D. Sawyer & M. Elia* 95A
An assessment of the validity of the 7 d weighed records (7dWR) of food intake in urban and rural Mexican women. *C. P. Sanchez-Castillo, S. Bonner, Ma. de L. Solano, N. Lopez & G. McNeill* 96A
Pattern of production of selected crops and their influence on child nutrition in Malawi. *M. O. Mpoma, B. M. Margetts, A. A. Jackson, Kandaya & J. Milner* 97A
Gastrointestinal disease, diarrhoea and growth faltering in Gambian infants. *P. G. Lunn, C. A. Northrop-Clewes & R. M. Downes* 98A

6–8 December 1994

Changes in body composition in response to chemotherapy in patients with acute myeloid leukaemia. *G. E. A. Bettany, A. C. Newland & J. Powell-Tuck* 100A
Nutritional screening: evaluation and implementation of a simple nutrition risk score. *H. M. Reilly, J. K. Martineau, A. Moran & H. Kennedy* 101A
Two-phase randomized controlled clinical trial of oral dietary supplements in surgical patients: results of in-patient phase I. *A. M. Keele, M. J. Bray, P. W. Emery & D. B. A. Silk* 102A
Comparison of implanted ports with Broviac/Hickman-style tunnelled catheters for long-term home parenteral nutrition: the patient's view. *S. Magnay, C. Wheatley, S. Wood & A. Forbes* 103A
Changes in enteral feeding: a positive response to clinical audit. *J. M. Stanford, G. Frost, J. Walters, C. MacQueen, P. Marshall, S. Martin, M. Kelly & K. Masters* 104A
The use efficacy and monitoring of artificial nutritional support (ANS) in a teaching hospital. *J. P. McWhirter, K. Hill, J. Richards & C. R. Pennington* 105A
Postoperative analgesia, stress response and urinary nitrogen excretion after upper abdominal surgery. *M. M. Shalaby, H. M. Basha, M. I. Ramadan, W. K. Narshy & I. T. Campbell* 106A
Thiamin status of people with AIDS. *A. K. Hardiman, C. Baldwin, A. Pozniak & P. W. Emery* 107A
Docosahexaenoic acid (DHA) and visual function in infants with fat malabsorption secondary to liver disease. *C. H. Spray, S. V. Beath, K. D. Willis, C. Suttle, V. Tipper, I. W. Booth, G. A. Harding & D. A. Kelly* 108A
Measuring individual energy requirement in infants: inaccuracy of predictive equations and validation of heart rate monitoring. *M. A. Thomson, S. Bucolo & R. W. Shepherd* 109A
Growth hormone and exogenous glucose utilisation rates in multiple organ failure. *Ceri J. Green, Ellen O'Sullivan, S. Underhill, L. J. Hipkin, D. P. M. Maclaren & I. T. Campbell* 110A
Importance of measuring CO_2 production rate in ^{13}C breath tests. *S. Amarri, W. A. Coward, M. Harding & L. T. Weaver* 111A
Energy metabolism in patients treated by continuous ambulatory peritoneal dialysis (CAPD). *J. Harty, L. Conway, M. Keegan, M. Venning, I. Campbell & R. Gokal* 112A
Relationship between muscle thickness measured using ultrasound and fat-free mass measured with dual energy X-ray absorptiometry (DEXA). *D. J. Withers, J. E. Adams & I. T. Campbell* 113A
Body composition and physiological measures of fitness during re-feeding of anorexia nervosa patients. *E. G. Waller, A. J. Wade, J. Treasure, A. Ward, T. Leonard & J. Powell-Tuck* 114A
Comparison of three simple methods for the detection of malnutrition. *J. M. D. Nightingale, N. Henry, P. Nair, M. E. Bullock & A. C. Wicks* 115A
Measuring the height of critically ill patients in bed. *T. Watt, J. Clayton, M. A. Keegan & I. T. Campbell* 116A
Visual analogue scales: a validated tool for assessing nutritional need in head and neck cancer patients. *C. MacQueen & G. Frost* 117A

Diurnal variation of plasma glutamine and arginine in normal and fasting subjects. *L. M. Castell, C. T. Liu & E. A. Newsholme* 118A
The effect of lipoproteins isolated from rats fed on different dietary lipids upon lymphocyte proliferation. *N. M. Jeffery, P. Yaqoob, P. C. Calder & E. A. Newsholme* 119A
Serum cholesterol levels in rats fed on high-fat diets do not correlate with serum arginine levels. *C. T. Liu, P. Yaqoob, P. C. Calder & E. A. Newsholme* 120A
The effect of dietary lipid manipulation on macrophage phospholipid fatty acid composition and membrane fluidity. *E. J. Sherrington, D. J. Harvey & P. C. Calder* 121A
Glutaminase (*EC* 3.5.1.2) and glutamine synthetase (*EC* 6.3.1.2) activities in the gastrointestinal tract of rats. *L. A. James, P. G. Lunn, G. Jennings & M. Elia* 122A
Requirement for both glutamine and arginine by proliferating lymphocytes. *P. C. Calder* 123A
Influence of cell culture conditions on diet-induced changes in lymphocyte fatty acid composition. *P. Yaqoob & P. C. Calder* 124A
The effect of dietary fatty acid composition on postprandial glycogen and lipid synthesis in tumour-bearing rats. *P. M. C. Ho, O. A. Obeid & P. W. Emery* 125A

2–5 August 1994

Validation of a food-frequency questionnaire in a small sample of children aged 12–24 months. *M. A. Hirving, M. S. Lawson, C. Goodhart & C. Dogan* 128A

17 January 1995

Vitamin D activity of meat. *S. M. Lee, D. H. Buss & D. Hatton* 130A
Current selenium content of foods and an estimation of average intake in the United Kingdom. *M. A. Butcher, P. A. Judd, C. Caygill, S. Peach & A. T. Diplock* 131A
Food patterns and nutrient intake in short-stature children. *Catherine M. Pollard, Stephen A. Wootton & Peter R. Betts* 132A
Diversity of diets amongst South Asian Muslims in Britain. *Tashmin Kassam Khamis, Jane E. Thomas & Patricia A. Judd* 133A
A feasibility study of a monounsaturated fatty-acid-rich diet in middle-aged subjects. *J. A. Tredger, C. Culverwell, J. Knapper, J. Wright & C. M. Williams* 134A
An evaluation of the feasibility of sip-feed supplementation in undernourished, acutely sick, elderly patients. *J. J. Reilly, M. Mackintosh, J. Potter & M. A. Roberts* 135A
Coordinated response of liver and muscle protein synthesis to fasting and refeeding in 12-month-old rats. *Laurent Mosoni, Thierry Malmezat, Christiane Obled & Philippe Patureau Mirand* 136A
Diurnal cycling in urea-nitrogen hydrolysis. *T. S. Meakins & A. A. Jackson* 137A
The blood pressure response of normotensive rats and rats with maternal-diet-induced hypertension to diets of differing fatty acid composition. *S. C. Langley-Evans & A. A. Jackson* 138A

Rats with hypertension induced by *in utero* exposure to maternal low-protein diets, fail to increase blood pressure in response to a chronically high salt intake. *S. C. Langley-Evans & A. A. Jackson* 139A
Pharmacological adrenalectomy during pregnancy abolishes maternal-diet-induced hypertension in the rat. *S. C. Langley-Evans, G. J. Phillips & A. A. Jackson* 140A
Factors influencing creatine retention in man. *A. L. Green, I. A. Macdonald & P. L. Greenhaff* 141A
The influence of treadmill walking on the lipaemic and metabolic responses to a high-fat meal in women aged 35 to 50 years. *N. V. Tsetsonis, D. M. Roche & A. E. Hardman* 142A
The effect of 13 weeks' endurance running training followed by 9 d detraining on fasting and postprandial triacylglycerol concentrations. *S. L. Herd, C. J. Cairns, K. S. Moore, A. E. Hardman & L. H. Boobis* 143A
The origin of plasma non-esterified fatty acids in the postprandial period. *B. A. Fielding, J. Callow, R. Owen, J. S. Samra & K. N. Frayn* 144A
The role of cortisol in regulation of lipolysis in normal subjects after an overnight fast. *J. S. Samra, M. L. Clark, S. M. Humphreys, K. N. Frayn & I. A. Macdonald* 145A
The 24 h energy expenditure and urinary catecholamines of healthy young men given medium-chain triacylglycerols incorporated into a typical "Western" diet: a dose-response study in a human respiratory chamber. *A. G. Dulloo, M. Fathi, N. Mensi & L. Girardier* 146A
Long-chain but not medium chain triacylglycerols increase factor VII coagulant activity. *Najat Yahia, G. J. Miller & T. A. B. Sanders* 147A
Effects of elaidic acid (18:1 *n*-9 *trans*) and oleic acid (18:1 *n*-9 *cis*) on plasma and hepatic cholesterol concentrations in the hamster. *Mary B. C. Ascott, Lucie Pollard & T. A. B. Sanders* 148A
Beneficial effects of plant volatile oils on the retinal lipids during ageing. *Zsuzsa Recsan, Giampiero Pagliuca, Laszlo G. Penzes, Stanley G. Deans, Raymond C. Noble & Marco V. Piretti* 149A
Impact of plant volatile oils upon enzymes involved in lipid peroxidation. *Stanley G. Deans, Allan Macpherson, Raymond C. Noble, Laszlo G. Penzes & Sandor G. Imre* 150A
Liver and kidney volume and their relationship to metabolic rate at rest. *G. McNeill, M. A. Foster, J. Love & V. Antfang* 151A
Waist circumference predicts intra-abdominal fat mass better than waist:hip ratio in women. *T. S. Han, G. McNeill, P. Baras & M. A. Foster* 152A

6–9 September 1995

Postprandial triacylglycerolaemia and coagulation factor VII activity following meals containing varying proportions of olive oil. *H. M. Roche & M. J. Gibney* 154A
The effects of fish-oil supplementation on lipoprotein composition and structure. *J. D. Bell, M. L. Barnard, P. D. Dagnelie, E. L. Thomas & S. Cunnane* 155A
Lipid and carbohydrate utilization in a diet-induced model of obesity. *Beatriz Berraondo, F. I. Milagro, Raquel Perez, Maria A. Zulet & J. A. Martinez* 156A

Differences between men and women after cardiac rehabilitation: an assessment of dietary compliance, nutritional knowledge and dietary perceptions. *J. M. Julian, M. A. T. Flynn, F. Rafferty & J. H. Horgan* 157A

An *in vivo* study of the relationship between diet and adipose-tissue composition. *E. L. Thomas, G. Frost, M. L. Barnard, D. J. Bryant, S. D. Taylor-Robinson & J. D. Bell* 158A

Analysis of body-fat distribution by magnetic resonance imaging and impact on the metabolic risk factor profile. *M. L. Barnard, E. L. Thomas, J. E. Schwieso, J. V. Hajnal, G. Frost, N. Saeed, S. R. Bloom & J. D. Bell* 159A

Underfeeding by reduction in fat or carbohydrate intake: effects on energy expenditure, macronutrient oxidation and subsequent food intake in lean men. *P. M. Heavey, A. P. M. McKenna, G. R. Goldberg, P. R. Murgatroyd & A. M. Prentice* 160A

Glycation of insulin and proinsulin occurs in the pancreatic islets of lean and spontaneously obese-diabetic mice. *F. P. M. O'Harte, Y. H. A. Abdel-Wahab, C. R. Barnett & P. R. Flatt* 161A

Energy expenditure and carbohydrate flux in type 1 (insulin-dependent) diabetics. *M. Totton, P. R. Murgatroyd, G. R. Goldberg & A. M. Prentice* 162A

The effect of intensive dietary counselling on the nutritional status of patients with head and neck cancer undergoing radiotherapy. *F. Ní Choileáin, M. Moriarty, M. J. Gibney & M. Moloney* 163A

Development of a food protein atlas as an educational tool in dietary counselling of renal patients. *S. M. Doyle & M. Moloney* 164A

Cytotoxic effects of cholesterol oxides and the potentially protective properties of α-tocopherol and β-carotene in rat kidney cells in culture. *A. M. Wilson, R. M. Sisk & N. M. O'Brien* 165A

Protective effect of carotenoids against UVA-light-induced oxidative stress in rat kidney cells in culture. *I. O'Connor, J. Young & N. M. O'Brien* 166A

The location of a carotenoid in a lipoprotein is a function of its polarity. *L. M. Edmond, U. J. McLoone, D. I. Thurnham & M. Chopra* 167A

The effect of *in vitro* and *in vivo* supplementation with lutein on LDL oxidation *in vitro*. *U. McLoone, M. Chopra, N. R. Williams & D. I. Thurnham* 168A

Plasma tocopherols, carotenoids and antioxidant activity of neonates. *M. E. Kiely & P. A. Morrissey* 169A

Plasma lutein, lycopene and β-carotene levels in smokers and non-smokers following vegetable supplements. *M. E. O'Neill, U. J. McLoone, M. Chopra, D. I. Thurnham, I. Hininger & A. M. Roussel* 170A

Evaluation of a nutrition risk scoring method. *A. M. Tully, P. Flood & N. P. Kennedy* 171A

Waist circumference identifies cardiovascular risk factors. *Thang S. Han, Edith M. Van Leer, Jacob C. Seidell & Michael E. J. Lean* 172A

An investigation of the oils used in fast-food outlets in Galway city. *B. Kelly, S. Friel, G. Nolan & C. Kelleher* 173A

Evaluation of the Nutrition Education at Primary School (NEAPS) programme developed by the Departments of Health and Education, the Health Promotion Unit and the North West Health Board. *S. Friel, G. Nolan & C. Kelleher* 174A

Process evaluation of a community nutrition post in order to examine the implementation of the Nutrition Health Promotion Framework for Action. *M. O'Donnell & M. Lyons* 175A
Evaluation of a pilot community nutrition programme in the Western Health Board. *G. Nolan, S. Friel, C. Kelleher & M. O'Donnell* 176A
Validation of methodology employed in the diet and lifestyle survey of Irish and West Virginian women. *B. Kelly, S. Friel, G. Nolan & C. Kelleher* 177A
The use of food photographs as a tool for quantifying food and nutrient intake by 24 h recall. *P. J. Robson & M. B. E. Livingstone* 178A
Trans fatty acid status of Irish food products. *D. A. Cronin & J. O'Neill* 179A
Waist circumference indicates the need for weight management. *Thang S. Han, Caroline E. Morrison & Michael E. J. Lean* 180A
Body-fat distribution and interaction with coronary heart disease risk. *M. L. Barnard, G. Frost, E. L. Thomas, J. E. Schwieso, J. D. Bell, J. V. Hajnal, N. Saeed, O. M. Abumuhana & S. R. Bloom* 181A
The relationship between women's birth weight and their current intra-abdominal fat-mass. *Thang S. Han, Geraldine McNeill & Doris M. Campbell* 182A
Non-invasive characterization of neonatal adipose-tissue by ^{13}C magnetic resonance spectroscopy. *E. L. Thomas, D. Hanrahan, D. Azzopardi, M. L. Barnard, D. J. Bryant, G. Frost & J. D. Bell* 183A
The effect of dietary α-tocopherol, curcumin and eugenol on lipid peroxidation in rat tissues. *I. O'Connor, A. O'Sullivan & N. M. O'Brien* 184A
An investigation of the intracellular location of cholesterol oxidation products in Swiss albino 3T3 cells in culture. *R. M. Sisk, A. M. Wilson & N. M. O'Brien* 185A
The effect of oxalate and citrate on calcium absorption in the rat. *T. Bennett, K. Cashman & A. Flynn* 186A
The stability of plasma vitamin C during storage in cryo-bio straws in liquid nitrogen and in metaphosphoric acid at −70° over a 16-month period. *L. M. Edmond, D. I. Thurnham, & S. A. Bingham* 187A
Evaluation of the biological activity of monoglycated human insulin using the euglycaemic hyperinsulinaemic clamp technique in man. *A. C. Boyd, S. J. Hunter, F. P. M. O'Harte, I. Wiggam, C. N. Ennis, R. Gamble, B. Sheridan, C. R. Barnett, H. McNulty, P. M. Bell & P. R. Flatt* 188A
Evaluation of Nutrifil, a nutritionally complete supplementary food, with respect to acceptability and weight gain in malnourished children in Katale Refugee Camp, Zaire. *P. M. Mathias & D. G. Byrne* 189A
The effect of oral and intramuscular iodine supplementation on goitre and thyroid hormone status of Tanzanian schoolchildren. *F. J. Malone, J. J. Strain, A. M. Gray, N. C. Rollins, J. A. Dodge, K. Mtebe & N. Bangu* 190A
Copper supplementation and bone-mineral density in middle-aged women. *J. Eaton-Evans, E. M. McIlrath, W. E. Jackson, H. McCartney & J. J. Strain* 191A
Excretion of urinary pyridinium crosslinks in healthy young adults: inter- and intra-individual variations and effects of sodium. *F. Ginty, K. Cashman & A. Flynn* 192A
The effect of dietary casein on calcium absorption from a purified diet in the rat. *T. Bennett, M. Harrington, K. Cashman & A. Flynn* 193A

Influence of sulphydryl content of meats on the *in vitro* dialysability of iron. *B. Mulvihill & P. A. Morrissey* 194A
Bioavailability of pteroylglutamic acid in bread in human subjects. *M. Cantwell, J. McPartlin, M. A. T. Flynn, M. Goggins, D. Weir & J. M. Scott* 195A
Changes in folate status in response to pteroylglutamic (folic) acid supplements, folic acid-fortified foods, food folate and dietary advice. *Geraldine J. Cuskelly, Helene McNulty & John M. Scott* 196A
Analysis of the readership, belief and usage of food label information amongst Irish shoppers. *Joan K. Mahon & Michael J. Gibney* 197A
How do caterers decide on portion sizes? *Y. Kinghorn, A. Wise & G. Blwyddin* 198A
The criteria by which two groups of consumers classified high, medium and low fat-containing foods. *Fiona O'Broin & Anne E. de Looy* 199A
Social status differences in biscuit, cake and confectionery consumption in north Glasgow. *W. L. Wrieden, M. K. McCluskey & C. Bolton-Smith* 200A
The potential role of starch-rich foods in achieving national targets for dietary fat reduction. *S. L. Burkill, J. P. Landman, P. Gray & T. R. Kirk* 201A
Changes in pattern of nutrient intake with advancing age in a healthy Irish population. *Moira Hurson & Sheila Sugrue* 202A
Macronutrient intake in South Asian and Italian women in the West of Scotland. *Annie S. Anderson, M. E. J. Lean, H. Bush, H. Bradby & R. Williams* 203A
Blood cholesterol and health in persons aged 25–45 years. *U. J. McLoone, M. Chopra, M. E. O'Neill, B. McPeake & D. I. Thurnham* 204A
